Modular Quadra Induction
p. 144

Connection of the Modular system

Elements' placing

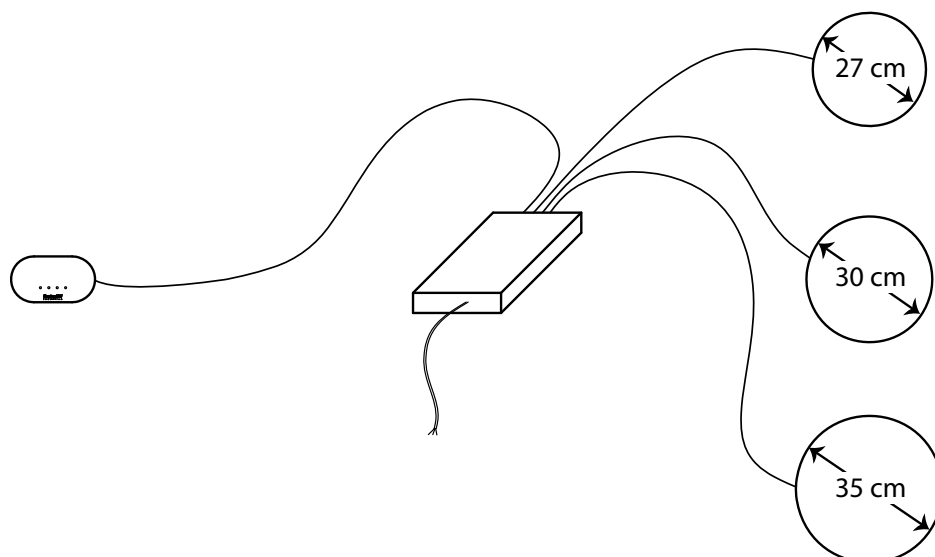

The Modular system allows a free placing of its elements. The only limit is posed by the length of the cables which connect the different elements to the connection box: 60 cm between touch-control unit and connection box and 90 cm between cooking plates and connection box.

Combination of cooking plates

The system can be assembled freely; some combinations that are not possible are highlighted in the remarks concerning the Touch control modules

Connection box

The set-up is easy and intuitive. The box can be placed on the wall behind the cabinet or inside it, under the countertop.

Modular and Modular Quadra Induction Series

Maximum freedom

Modular Induction is a new Foster proposal that offers full freedom to compose your induction hob according to the available space and your specific needs.

Countless possibilities

The three models of hobs, different for diameter and power, can be positioned with great flexibility in combinations of two, three or four zones controlled by their own touch controls.

Intuitive installation

The installation is quick and easy thanks to the connection box, easy to fit under the worktop, which connects the plates to the touch controls.

Matching to your style

Modular Induction is available in black or white version, for a perfect harmony with your worktop and your kitchen.
