

FISHER & PAYKEL

KITCHEN PERFECTION

FOR DESIGNERS AND ARCHITECTS

EST. 1934

DESIGNED IN AOTEAROA NEW ZEALAND

Designed in Aotearoa New Zealand is our philosophy and our identity. We are shaped by the environment and our geographic isolation, which have fostered a pioneering spirit and culture of curiosity that is uniquely ours. Our worldview drives us to constantly challenge conventional thinking about the life lived around appliances. Our global outlook inspires us to collaborate and learn from others, gathering insights and experiences that inform the way we create moments of delight in the home.

DESIGN PRINCIPLES

KITCHEN PERFECTION

While the kitchen is the heart of the home, the heart of the kitchen is people. Seeking insights into the ways people shop, cook and entertain gives a rich understanding of what's important in this space. The perfect kitchen is one that brings together a complete suite of complementary appliances, and through unique, intuitive features inspires the creation of perfect results. It is about the freedom to express yourself through styles, layout and patterns of use, to create a kitchen tailored to your preferences.

CREATE A LUXURY KITCHEN EXPERIENCE

At Fisher & Paykel, we design products according to three key design principles, so you can create Kitchen Perfection.

ULTIMATE KITCHEN SOLUTIONS

Creating the perfect meal requires a suite of luxury appliances working together seamlessly. Enjoy an exceptional kitchen experience with cooking and cooling solutions that respect ingredients through the Mastery of Temperature, and exceptional dishwashing and ventilation solutions that deliver perfect results, every time.

DESIGN FREEDOM

As the heart of the home, the kitchen serves as both a multifunctional space and an architectural statement. Design Freedom is the ability to customise a kitchen layout with work zones that exactly suit the way you want to live, cook and entertain, and personalise design details to achieve a highly considered and bespoke design.

A HARMONY OF PERFORMANCE, AESTHETICS AND PLACEMENT UNDERPINS ANY VISION OF KITCHEN PERFECTION

THE BEAUTY OF CHOICE

All homes are different, with different architectural and aesthetic demands. The Beauty of Choice is the ability to select the perfect appliance style, seamless integration, or product fit to bring your vision of Kitchen Perfection to life.

THE PERFORMANCE KITCHEN

Create kitchen perfection with appliance combinations working seamlessly together to deliver perfect results.

COOKING IN DETAIL

Perfect results in the kitchen seldom come from one type of heat. Just as the best cuisine is a combination of complementary ingredients, the best kitchens combine connected appliances that give you precise control. Sauté, melt, sous vide, steam, roast or bake — any ultimate cooking solution enables different methods and techniques across the temperature spectrum. It's the ability to introduce the right heat source at the right moment, and hold at the right temperature to create perfect results.

DISHWASHING IN DETAIL

At Fisher & Paykel, we're redefining luxury kitchen experiences in the home. Twenty-five years ago, we revolutionised the way people wash dishes with the DishDrawer™ Dishwasher. Today, our innovative dishwashing solutions continue to deliver exceptional ergonomics and cleaning performance.

MEET YOUR KITCHEN ASSISTANT:

INTRODUCE SMARTER KITCHEN
EXPERIENCES TO THE HOME

COOLING IN DETAIL

Our refrigeration design approach has evolved beyond the 'fridge and freezer' to optimal food care. We believe the care you take to select exceptional ingredients, produce and wines should be matched in the home with perfect preservation. By combining our complementary food and wine care appliances, you can create a refrigeration solution tailored to suit the ways you shop, cook and entertain.

VENTILATION IN DETAIL

Effective ventilation is integral to the kitchen experience. Our quiet, powerful solutions play an essential role in creating cleaner, healthier and more social kitchens. Our integrated, overhead, fixed, remote, and downdraft ventilation products do more than keep the air clean, they make the cooking experience a beautiful experience.

MASTERY OF TEMPERATURE

Perfect results come from the Mastery of Temperature. It is the science behind the art of cooking, delivering precise, responsive and consistent temperature control across all modes of heat, helping make even complicated techniques intuitive. It is the ability to optimise cooling climates for optimal preservation, because every food has unique requirements for the best of care and even subtle changes in temperature and humidity can reduce freshness, nutritional content and flavour

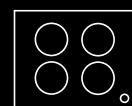

COOKING

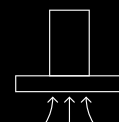

Perfect results in the kitchen seldom come from one type of heat. Just as the best cuisine is a combination of complementary ingredients, the best kitchens bring together the right appliances to give a chef absolute control. Combine luxury cooking appliances to create a complete kitchen suite, giving true mastery of temperature.

OVENS

HOBS

VENTILATION

MINIMAL STYLE

Complement the smooth, uninterrupted lines of your kitchen design with visually recessive, monochromatic ovens. With seamless design and handleless options, Minimal Style ovens are an ideal match for modern kitchens with an emphasis on elevated materiality and an continuous design.

Pair complementary companion appliances to create a kitchen suite for every need

Pair complementary companion appliances to create a kitchen suite for every need

CONTEMPORARY STYLE

Distinctive and timeless, the Contemporary style supports a range of kitchen design approaches. The clean lines, perfect proportions, and refined material contrasts allow you to extend a unified design language right across the kitchen, for a beautifully considered aesthetic.

Pair complementary companion appliances to create a kitchen suite for every need

Pair complementary companion appliances to create a kitchen suite for every need

CONFIGURE AND CUSTOMISE

Achieve Kitchen Perfection with a full suite of companion products that deliver specialised functionality and extend the design aesthetic of cooking appliances for a beautifully considered kitchen. Sized to fit and designed to match, companion products can be configured with Fisher & Paykel Trim Kits to create the ultimate kitchen solution.

GRID

Place cooking appliances in a grid pattern for a combination that brings a considered look to the kitchen and makes the best use of vertical space.

STACK

Compact homes have become a common feature of modern life, where considered design ensures every space is optimised to give exceptional usability in a small footprint.

SIDE-BY-SIDE

With design elements that align perfectly to create horizontal flow, side-by-side configurations can make a kitchen look longer and more spacious.

INDUCTION HOBS

Induction brings the perfect balance of power and control to the cooking suite, with elegant tempered glass to complement the design aesthetic of the modern kitchen.

REFRIGERATION

At Fisher & Paykel, we've evolved refrigeration beyond simply cooling and freezing, to solutions designed for optimal food care. The best refrigeration gives you the control to set the right temperature with the right humidity for your food, and the flexibility to care for it with products that keep ingredients fresher, longer. Configure a cooling solution to match every type of food, in the perfect design style to match your kitchen aesthetic.

REFRIGERATION

WINE

INTEGRATED REFRIGERATION

Designed to match your cabinetry, Integrated style refrigerators offer the freedom to blend seamlessly with the kitchen, or contrast with stainless steel panels and handles.

ACCESSORIES

Create luxury kitchen suites that truly reflect the life you want to live in the home, with a range of door panels and handles, that pair perfectly with your appliances. Supporting Design Freedom, our range of accessories provides an elegant solution to configure your appliances according to your design vision, in complementary styles and finishes.

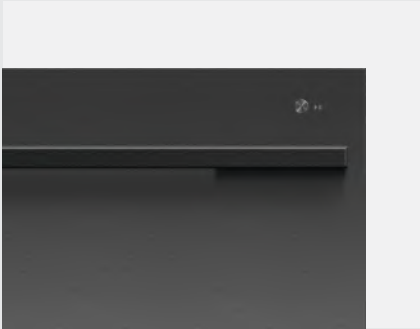

DOOR PANEL OPTIONS

Enjoy full control over the finish of your appliances to create a seamless kitchen aesthetic.

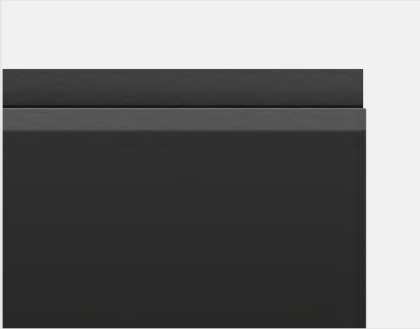

STAINLESS STEEL

Create a timeless aesthetic with high-grade stainless steel panels. Robust and durable, traditional stainless steel perfectly complements other materiality within your kitchen.

BLACK STAINLESS STEEL

Add depth and sophistication with high-grade black stainless steel panels. A powerful and refined choice for a modern luxury kitchen.

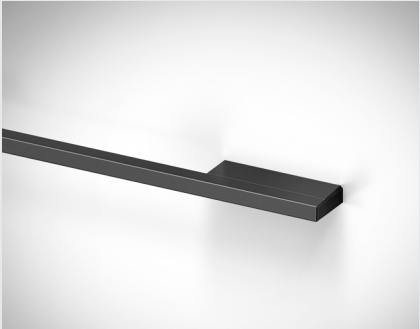

MATT BLACK GLASS

Sleek and tactile, a matte black glass finish pairs perfectly with a recessed handle, bringing the surrounding aesthetic into sharp focus.

For more detailed information, please refer to the website.

HANDLE STYLE OPTIONS

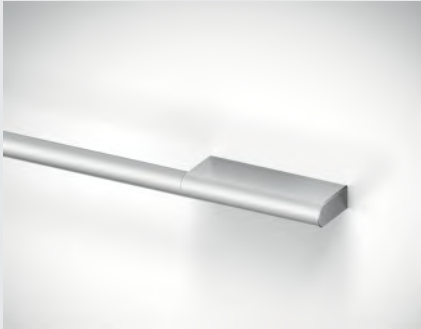

Handle styles that balance modern and traditional design cues, creating a sleek and refined look to complement any kitchen vision.

SQUARE FINE

With a timeless aesthetic that matches the Contemporary Style family of appliances, the bold geometric design of our Square handle complements modern and minimalist designs.

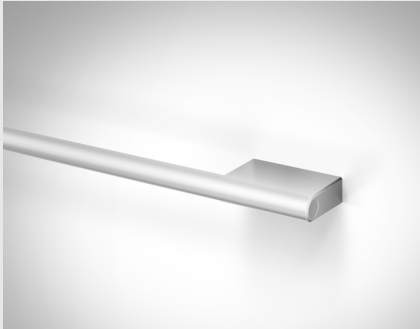

Finish | Aluminium | Black Aluminium

CONTEMPORARY ROUND

Designed to support varied kitchen design approaches, the Contemporary Round handle's smooth, rounded form is beautiful to use with a timeless, modern aesthetic and tactile luxury.

Finish | Aluminium

CLASSIC

Blending heritage design with a touch of modernity, the Classic Style round handle complements traditional design elements with seamless detailing and finishing, and expressive character.

Finish | Stainless Steel

For more detailed information, please refer to the website.

RESPECT FOR THE PLANET

CARBON IMPACT

As a company, we recognise climate change as one of the world's most urgent challenges and sustainability as the movement of our time. After completing a carbon emissions baseline covering all three scopes, and publishing our 2024 Carbon Impact Statement, we have identified and prioritised the areas where we can make the most meaningful impact on carbon emissions. From our 2020 baseline, our goals are to reduce Scope 1, 2, and 3 emissions per appliance sold by 50% by 2030 and by 90% by 2050.

CARBON IMPACT STRATEGY

Our Carbon Impact Strategy guides how we operate, create and collaborate with partners to reach our carbon goals. It is being applied in five key areas.

NEW COMPANY CHOICES

- Reducing carbon emissions in impactful ways across facilities, fleet and supply chain in all three scopes, including:
- Transitioning to low-carbon energy on company-owned sites.
- Improving energy efficiency and reducing waste in all operations.
- Sourcing low-carbon raw materials for our appliances.

NEW PRODUCTS

- Introducing appliances that are significantly more energy efficient, including:
- Upgrading current appliance platforms and designing new appliances with significantly enhanced energy efficiency and lower lifetime carbon emissions.
- Designing new appliance cycles that give consumers more opportunities to reduce energy consumption.

NEW CUSTOMER CHOICES

- Developing solutions that maximise the energy efficiency of our current product portfolio, including:
- Improving our product range with strategies to progressively eliminate the most carbon intensive appliances.
- Influencing purchasing behaviour by helping customers understand the carbon impacts of different appliance choices.
- Informing customers about optimising appliance use to minimise energy-related carbon emissions. Also providing insights into how our appliances can help customers avoid carbon emissions, eg. by reducing food waste.

NEW TECHNOLOGIES

- Investing in research, development and disruptive innovation to fast track home energy use decarbonisation.
- Establishing the Fisher & Paykel Carbon Zero SmartHome R&D Institute, we've begun investing in performance innovation across appliances, platforms and whole-of-home solutions, providing opportunities to:
- Accelerate carbon emission reductions at scale through significant energy efficiency and technology cost reductions.
- Combine our design, manufacturing and innovation expertise with the Haier Smart Home Group and other expert partners, globally.

NEW ECOSYSTEMS

- Contributing to the creation of carbon net zero homes through integrated energy generation and management, and data driven ecosystems.
- Evolving connected appliance ecosystems to support carbon emissions reduction through load-shifting and releasing new software updates that deliver additional energy efficiency benefits.

CONNECTED HOME

At Fisher & Paykel, we're always looking for insights into the life lived around our products to inspire and create new moments of delight in the home. Our connected appliances combine with the SmartHQ™ app to introduce unique new kitchen experiences to the home, as well as greater convenience and seamless control and versatility.

CONNECTED APPLIANCES

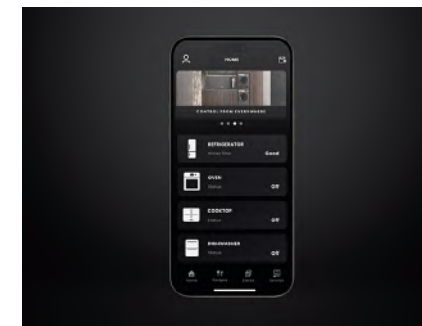

SMARTHQ™ LIVING

With SmartHQ™, all your connected appliances are in one place. Stay connected in and out of the home with seamless updates that anticipate your future needs.

HELP IS ALWAYS AT HAND

Luxury appliances within our Connected Home ecosystem are even more beautiful to use. Enjoy remote control and helpful notifications that give you greater visibility of appliance performance. Easily monitor the status of active cook zones or know when it's time to replace the water filter in your fridge, and let SmartHQ™ help you order a replacement directly through the app.

SMART AND SECURE

SmartHQ™ is the control platform of choice for several leading global appliance brands. It is designed to protect your appliances and data with gold-standard encryption and data protection. Regular testing and updates ensure the gold-standard is met and maintained.

FUTURE READY LIVING

Go from moments of delight in the heart of the home to moments of delight anywhere. At home, at work, or on holiday, SmartHQ™ keeps you seamlessly connected to your home ecosystem.

A photograph of the Fisher & Paykel Experience Centre storefront at night. The building features a large glass facade with a warm, golden light emanating from within. A man and a woman are standing in front of the glass, looking at a large, rough-hewn rock sculpture. The sky is dark, and the building's interior lights create a strong contrast with the exterior.

FISHER & PAYKEL

GLOBAL EXPERIENCE CENTRES

To appreciate our approach to appliance design is to experience the benefits of what we offer first hand. Our bespoke global Experience Centres capture the essence of what it means to be Designed in Aotearoa New Zealand. They are a manifestation of our brand, designed for you to explore the potential of our luxury appliances in immersive settings, and to see and taste how our design approach translates into Kitchen Perfection in the heart of your home.
